

Dear Editor,

2nd June, 2018

Please find attached our revised manuscript, entitled “Haploid selection, sex ratio bias, and transitions between sex-determination systems”. We thank the academic editor for their suggestion. We have reworded the section to improve its clarity, as outlined in the ‘response to reviewers’ file and highlighted in the tracked changes file (diff2.pdf).

We are grateful for the help provided by the reviewers and editors and are excited to have this work published in *PLoS Biology*.

Sincerely,

Michael Scott
